Experience

2022 - Present
Microsoft India - Principal Group Engineering Manager
- Leading strategic charters for
  - **(A) Python in Excel and**
  - **(B) Outlook Extensibility (Add-ins)**
- Redefining Excel with GenAI capabilities which will transform how users interact with data with Advanced Analysis and Python
- Leading Outlook Extensibility (New Outlook, macOS and Mobile platforms) adoption and Add-ins modernization
- Driving Digital Native initiatives for Microsoft IDC

2020 - 2022
PayPal India - Senior Software Development Manager
- Managed a team of 23 engineers with 2 Managers reporting to me for 2 different projects.
  - Successfully led the migration of **Digital Wallet Activity** module (similar to transaction history in GPay) from 1.0 to 2.0 version.
  - Delivered **Widget (Server Driven UI)** for Activity which is pluggable in any module within PayPal and serves the same User experience.
  - Successfully led a **green field project** called **Document Center** (Self Service Tax portal for Consumers). and launched in Dec 2021.
- Modeled, coached and guided 2 new managers and polished them into Management role.
- Involved in all tech design discussions and handled resourcing, stakeholder management, and SLT representations. Presented our plan and design to SVPs of the organization.

2018 - 2020
Walmart Labs - Senior Engineering Manager

Managed 2 large teams of Senior engineers and Staff engineers.
- Drove successful Pharmacy COVID initiatives through the implementation of customer-oriented features like Curbside pickup, Ship from Store, In-Home, and Immunization. These enhancements significantly improved healthcare services for customers
- Executed and represented in Architecture forums for a new initiative to migrate the legacy Pharmacy backend architecture migration to Azure.
- Led the execution and delivery of the Global Supplier Management product across US and Canada markets., by migrating the legacy architecture to Azure cloud, leading to better scalability, availability and reduced Opex cost. Saved at least a minimum of 20% Opex cost with the final state architecture.
